

## Invitation to SSF member event: Launch of SSF e-learning tool for financial professionals - “Sustainable investments in a changing world”

**Date:** Thursday, 28 June 2018, 12:00-14:00 (Lunch will be provided)

**Location:** Edmond de Rothschild, Rue de Hesse 18, 1204 Geneva

Capacity building in sustainable finance is one of the key drivers to advance investments in more sustainable products. Therefore, the SSF workgroup on education has created four e-learning modules tailored specifically to the needs of finance professionals. Case studies as well as sustainability profiling of clients offer an interactive learning experience of practical value.

At this event, organized and hosted by Swiss Sustainable Finance and Edmond de Rothschild, we will present the SSF e-learning tool exclusively to our members. In a subsequent discussion, we wish to gather your feedback on this educational tool and jointly identify the best way to disseminate it amongst our members and network partners.

A link to the education material will be sent to all members in advance of this meeting.

SSF will also be organising informational events on this educational tool in Lugano and Zurich in the second half of 2018. We will send further information over the summer.
