

Invitation: Investor Workshop on Carbon Foot Printing (Zürich)

Date and Time: Thursday, 5 November 2015, 16:30-19:15 (followed by apéro)

Location: Haus zum Rüden, Limmatquai 42, 8001 Zürich

In light of the recent focus on portfolio carbon intensity, SSF, in partnership with IIGCC, would like to offer our network a closer look at the different carbon foot printing techniques currently available and have an open discussion on the obstacles and benefits of such techniques. We have invited four data providers to analyse the carbon footprint of a model portfolio and present their results.

Through a discussion with service providers and institutional asset owners, we will cover questions such as:

- How have investors used carbon footprints and other data for measurement, decision-making and engagement with companies and managers? Can different data be used for different purposes?
- What are the lessons learned? Is there a need for developing a global standard for reporting?
- Does this take us closer to a 2-degree economy? How can investors manage the both goals of reducing carbon risk and low-carbon impact investing?

Program

16:00-16:30	Registration
16:30-16:35	Welcome by Sabine Döbeli , CEO Swiss Sustainable Finance (SSF)
